

MASTER PROFILE PROMPT

Attach your worksheet and Master_Profile_Example.md to a Claude chat, then paste this prompt

I've attached two files: my filled-out Master Profile Worksheet (Word document), and Master_Profile_Example.md, a sample finished Master Profile showing the exact format to follow.

Your task:

- Read everything in my attached worksheet.
- Build my own Master Profile that matches the structure, section order, and formatting of the attached example file exactly, including the frontmatter block at the top.
- For every job, project, or activity I wrote about, extract: Context, Dates, What was actually done, Tools, Verified keywords, and Do not claim.
- For Phone (under Identity & Credentials) and Dates (in each Experience Vault entry), only fill these in if I explicitly gave you a phone number or precise start/end dates. Otherwise, write "Not yet provided" exactly. Do not guess a date range from context clues, and do not add missing phone or dates to Needs Follow-Up, leaving them blank at this stage is expected, not a gap.
- Only use keywords and facts that come directly from what I actually wrote. Do not invent numbers, tools, dates, or outcomes I did not mention.
- If something else I wrote is vague or incomplete, do not guess or fill it in. Instead, add it to a "Needs Follow-Up" section at the very end of the file, so I can fill the gap in with my caseworker later.
- Only include a Relevant Coursework section if I actually named specific courses. Skip any section entirely if my worksheet gave you nothing for it.

Give me the entire file as one single Markdown code block, so I can copy it in one piece. Do not summarize or shorten anything I wrote, keep the real detail.

What happens next

Claude reads your worksheet and matches the format of the attached example in one pass, no back and forth needed. If something you wrote was vague or missing a number, Claude will not invent one, it will flag it under "Needs Follow-Up" instead.

You'll get back one complete file in a single gray code box. That box is your finished Master Profile.

Note: Attach both files before sending: your worksheet and Master_Profile_Example.md. Claude uses the example as the exact template to match, so don't skip attaching it.
