

RESUME BUILD

Step-by-step instructions · YPCA Career Sprint

Before you start

By the end of this part you will have a complete, general resume built from your Master Profile. You need three things: your finished Master Profile file from last time, a resume template (from the shared folder), and Claude.

Getting your files ready

1. Find your Master Profile.

Open your "YPCA Career Sprint" folder and locate the YourName_Master_Profile.md file you saved last time. If you can't find it, ask for help before continuing, everything in this part depends on that file.

2. Download the resume template.

Open the shared folder link and download the resume template file into your "YPCA Career Sprint" folder.

Building your resume with Claude

3. Open Claude in a browser tab.

Go to claude.ai and start a new chat.

4. Attach your Master Profile.

Click the paperclip or attach icon and attach your YourName_Master_Profile.md file.

5. Attach the resume template.

Click attach again and add the resume template file. This shows Claude exactly what format and structure to build your resume in.

6. Open the prompt file and copy it.

Open Resume_Build_Prompt.docx and select all the text inside the gray box, then copy it.

7. Paste the prompt and send.

Paste the prompt into the Claude chat box, underneath your two attached files, and hit send. Claude will read your Master Profile and build a complete resume matched to your template, using only real facts and your strongest, most relevant experiences.

Tip: This is a general resume, not tailored to one specific job yet. That comes in the next part of the session.

Finishing your resume

8. Open your resume template.

Open the resume template file you downloaded, in Word.

9. Copy each section into the template.

Claude gave you your resume broken into sections that match your template. Copy each section from Claude's answer into the matching spot in your template, replacing the placeholder text.

10. Check for [ADD PHONE] or [ADD DATES].

If you see either of these placeholders anywhere in your resume, fill them in yourself with the real information before saving.

11. Save your finished resume.

Save the file as YourName_Resume.docx inside your "YPCA Career Sprint" folder.

***Tip:** If a section overflows the template or looks crowded, ask Claude to shorten it, or trim it yourself by keeping only your strongest one or two bullets per experience.*
