

MASTER PROFILE

Step-by-step instructions · YPCA Career Sprint, Hour 1

Before you start

By the end of this hour you will have one finished file: your own Master Profile, a detailed record of everything you've done that later gets used to build and tailor your resume. This hour has three parts: setting up, writing your notes, and turning them into your finished file with Claude's help. You need this instruction sheet, the shared folder link, and Claude. If you do not have a Claude account, go to claude.ai and sign up first, it is free to create an account.

Setting up your folder (15 minutes)

1. Create a folder on your computer.

On a laptop, right click on your Desktop and choose New Folder. Name it "YPCA Career Sprint." Everything you make today and next Saturday goes inside this one folder so you never lose track of your files.

2. Open the shared link and download all three files.

Open the link or scan the QR code you were given. It will take you to a folder with three files: Master_Profile_Worksheet.docx, Master_Profile_Example.md, and Master_Profile_Prompt.docx. Click each file, then click the download icon (usually top right) for each one, and move all three into the "YPCA Career Sprint" folder you just made.

Part 1: Write your notes (30 minutes)

This is the most important part of our session.

3. Open the worksheet and type into it.

Open Master_Profile_Worksheet.docx and type your answers directly into the document. If you're not sure how to phrase something or whether it counts, that's okay, someone will come around to help you gather your thoughts. You can also open Claude and ask it to help you think through and phrase an experience while you write.

4. Answer every section, thoroughly.

Go through Education, Work Experience, Projects, Volunteer/Leadership, and Skills. Write rough notes, not full sentences. Include more than you think you need, small details are easy to cut later but hard to remember if you leave them out now.

5. Ask for help if you're stuck.

Our main goal is to write this part as well as possible. If you're missing a detail, unsure whether something counts, or just blanking on an experience, put your hand up, someone will help you think it through.

Tip: Don't worry about spelling, grammar, or making it sound impressive. Nobody but you and Claude sees this raw version. Completeness matters more than polish.

Part 2: Turn your notes into your Master Profile (15 minutes)

6. Open Claude in a browser tab.

Go to claude.ai and start a new chat.

7. Attach your worksheet.

Click the paperclip or attach icon in the Claude chat box and attach `Master_Profile_Worksheet.docx`, your filled-in copy.

8. Attach the example file too.

Click attach again and add `Master_Profile_Example.md` from your folder. This shows Claude the exact format your finished file should follow.

9. Open the prompt file and copy it.

Open `Master_Profile_Prompt.docx` and select all the text inside the gray box, then copy it.

10. Paste the prompt, send, and save your file.

Paste the prompt into the Claude chat box, underneath your two attached files, and hit send. Claude will read your worksheet and build your Master Profile in one pass, flagging anything unclear under "Needs Follow-Up" instead of guessing. When it gives you the finished file in a gray code box, copy it, paste it into Notepad (Windows) or TextEdit on Mac (choose Format then "Make Plain Text" first), and save it as `YourName_Master_Profile.md` inside your YPCA Career Sprint folder. Make sure to type `.md` at the very end of the file name yourself, and choose "All Files" if your computer asks for a file type, so it doesn't default to `.txt`.

***Tip:** You can also save this same file as a Claude skill, so it's ready to load automatically whenever you ask Claude for help with your resume later, no need to re-attach it every time.*
